## FRUIT TREES

Fruits serve a double purpose in the home planting plan. In the early spring their blossoms are unsurpassed for beauty by any other plant or tree, and later on in the summer the fruit is delicious and offers a splendid opportunity for preserving and canning. You cannot go wrong by including a few choice fruit trees in your garden or lawn. We offer a list of standard varieties from which to select, and at unusually attractive prices. Our trees are one year old, especially adapted to the climatic conditions of the middle states, and are varieties that we believe to be productive and will bear productive crops. No home is complete without a few fruit trees. To those who are planning on planting commercial orchards, we are in position to quote most attractive prices on quantity lots.
